Status of Claims

1. Claims 1-28, 30 and 31 have been examined.

Response to Amendments/Arguments

2. Neville et al. teach communicating unrestricted playback information regarding previously recorded content when content has been executed a predetermined number of times (column/line 13/65-14/1; column 17, lines 3-5).

Regarding Applicant's use of "when", it has been language that suggest or makes optional but does not require steps to be performed or does not limit a claim to a particular structure does not limit the scope of a claim or claim limitation (MPEP 2106, section II, C; *In re Johnston*, 77 USPQ2d 1788 (CA FC 2006).

Claim Rejections - 35 USC § 103

- 3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.

Application/Control Number: 09/476,078

Art Unit: 3621

Page 3

4. Claim 1-28, 30 and 31 are rejected under 35 U.S.C. 103(a) as being unpatentable over Schulhof et al., U.S. Patent No. 5,572,442 in view of Neville et al., U.S. Patent No. 6,272,636.

As per claims 1-28, 30 and 31, Schulhof et al. teach a method for distributing music comprising:

- blanket transmitting, at faster than real time speeds,
 simultaneously a plurality of music selections to a plurality of
 customer households for receipt on a plurality of inputs (figures 1 and 5-7; column 5, lines 50-60)
- a first interface enabling at least one customer to preselect and record transmitted music selections in a read/write storage medium (e.g. read/write CDs, magneto-optical disks, digital tape) (abstract; figures 1, 4, and 6; column 5, lines 6-20 and 50-67; column 7, lines 5-53; column 8, lines 60-67; column 12, lines 54-67)
- a second interface permitting the customer to select recorded music for unrestricted playback (figures 1, 4, and 6; column/line 4/48-5/20; column 5, lines 50-67; column 7, lines 5-53; column 9, lines 20-26)
- communicating unrestricted playback selection information to a central controller, via satellite, cable,...etc., and billing the customer

Application/Control Number: 09/476,078

Art Unit: 3621

Page 4

for the selected unrestricted playback (column/line 4/48-5/20; column 6, lines 24-52; column/line 7/54-8/2; column 9, lines 20-26; column 10, lines 42-65)

- selection information that includes availability, scheduling and price data (column 5, lines 60-64; column 7, lines 27-33 and 45-53; column/line 7/61-8/4; column 9, lines 26-38)
- an interactive guide, via a display device, to allow users to make content selections, and select functions to playback and record content (abstract; figures 1-4, 6 and 7; column 7, lines 27-53; column/line 9/65-10/15; column/line 11/65-12/10; column 12, lines 54-67; column 13, lines 10-28; column 14, lines 18-26 and 39-55)
- receiving and decoding musical selections and storing decoded selections and associated information in a digital data storage device for temporary storage (figures 2, 3 and 7; column 9, lines 26-38; column 12, lines 10-18 and 29-67)
- accessing the content over the internet link to a website or phone line connection (figure 1; column 7, lines 35-52)
- allowing users to access content one or more times on a no-charge basis prior to permanently selecting the content (column 9, lines 27-37)

- generating a permanent enabling code for inclusion with the permanent recorded music selections to enable unrestricted playback (column 9, lines 27-37)
- communicating with a broadcast satellite up-link facility, operating
 in the KU or other suitable frequency bands, via a central controller,
 and transmitting program/pricing information to the broadcast
 facility on a periodic basis (figures 5 and 7; column 6, lines 24-52)

Schulhof et al. teach a system for transmitting audio content to a plurality of users, where users can record and playback content using a plurality of interfaces, and are billed for using the content distribution service (figures 1 and 4-7; column/line 4/48-5/67; column 6, lines 24-34; column/line 7/54-8/2). Schulhof et al. do not specifically recite using DVD-RAM to record content. However, Schulhof et al. teach that digital, optical, magnetic or other high density, high capacity can be used. Therefore, it would have been obvious to one of ordinary skill to use DVD-RAM for portable storage (column 4, lines 55-67; column 8, lines 59-67; column 12, lines 54-64). Similarly it would have been obvious to one of ordinary skill to store a plurality of disks with content recorded thereon. However, Schulhof et al. do not specifically recite "permitting the at least one customer household to select previously recorded music selections, that were previously recorded by the at least one customer household in the storage medium for unrestricted playback", nor does Schulhof et al. teach generating

enabling codes subsequent to the recording of music wherein said codes enable unrestricted playback. Neville et al. teach allowing users to access content stored on a user device on a trial basis, then sending an enabling code to allow further use of the previously recorded product after the trial period had expired (abstract; column 13, lines 5-44). Regarding Therefore, it would have been obvious to one of ordinary skill to combine the teachings of Schulhof et al. and Neville et al. to allow consumers to evaluate a fully functional product while protecting content providers from malicious use on the part of the consumer ('442, column 9, lines 27-37; '636, column/line 1/35-5/35).

Conclusion

5. Any inquiry concerning this communication or earlier communications from the Examiner should be directed to Calvin Loyd Hewitt II whose telephone number is (571) 272-6709. The Examiner can normally be reached on Monday-Friday from 8:30 AM-5:00 PM.

If attempts to reach the Examiner by telephone are unsuccessful, the Examiner's supervisor, Andrew Fischer, can be reached at (571) 272-6779.
